

# WIDTH

## Syntax

```
N = WIDTH( X )  
N = WIDTH( X, Y )
```

## Parameters

X is a number, [0,255]

X is a number, [MININT,MAXINT] Y is a number, [0,255]

## Description

For console, sets the line width to X. Zero means no wrapping will occur.

If X = 0, sets the console width to Y. If X < 0, sets the printer width to Y. If X is an open file number, sets the file line width to Y. Otherwise sets the console rows to X and the line width to Y. A value of zero for Y means no wrapping will occur.
