

FS_FLUSHBUF

Purpose

Flushes cache buffers for a specific volume.

Calling Sequence

```
int far pascal FS_FLUSHBUF(hVPB, flag)

unsigned short hVPB;
unsigned short flag;
```

Where

hVPB is the handle to the volume for flush.

flag	is used to indicate discarding of cached data.
<i>flag</i> == 0	indicates cached data may be retained.
<i>flag</i> == 1	indicates the FSD will discard any cached data after flushing it to the specified volume.

All other values are reserved.

Remarks

None.
