

[Q]: Рухнул desktop, а вместе с ним - и MMPM/2. Как восстановить MMPM/2?

[A]: Andrew Belov (2:5020/181.2)

Нужно изменить следующую строку в INI.RC, добавив "SND":

```
"SYS_DLLS"          "LoadPerProcess"      "PMCTLS SND "
```

Далее надо в конец INI.RC добавить новую секцию, в которой прописать список объектов и классов. Ниже приведен такой список, который я немного заточил под себя, разместив фолдер "Multimedia" в "OS/2 System". Исходный вариант добывается из значений PM\_InstallClass и PM\_InstallObject, помещаемых в OS2.INI сразу после установки MMPM/2 (при следующей загрузке PM их удалит).

Настройки драйверов при этом сохраняются - они лежат в \MMOS2\\*.INI. Чтобы восстановились иконки у объектов, все "?:" нужно заменить на букву диска, на котором стоит MMPM/2 ("C:", "D:").
